# *EasyCell*®*assistant*

Remote Review Software

Add workstations for greater efficiency and collaboration

Now technologists can review cell images from EasyCell assistants from anywhere. This allows for increased throughput for reviews and the added convenience of location independence.

Greater staffing efficiency
Assign multiple technologists to review EasyCell cell images and sign out patient samples. EasyCell Remote permits easy addition of staff for review of samples when needed.

Access to expert opinions
Share images with colleagues located at distant centers of excellence. Images from difficult cases can be conveniently sent to second opinions.
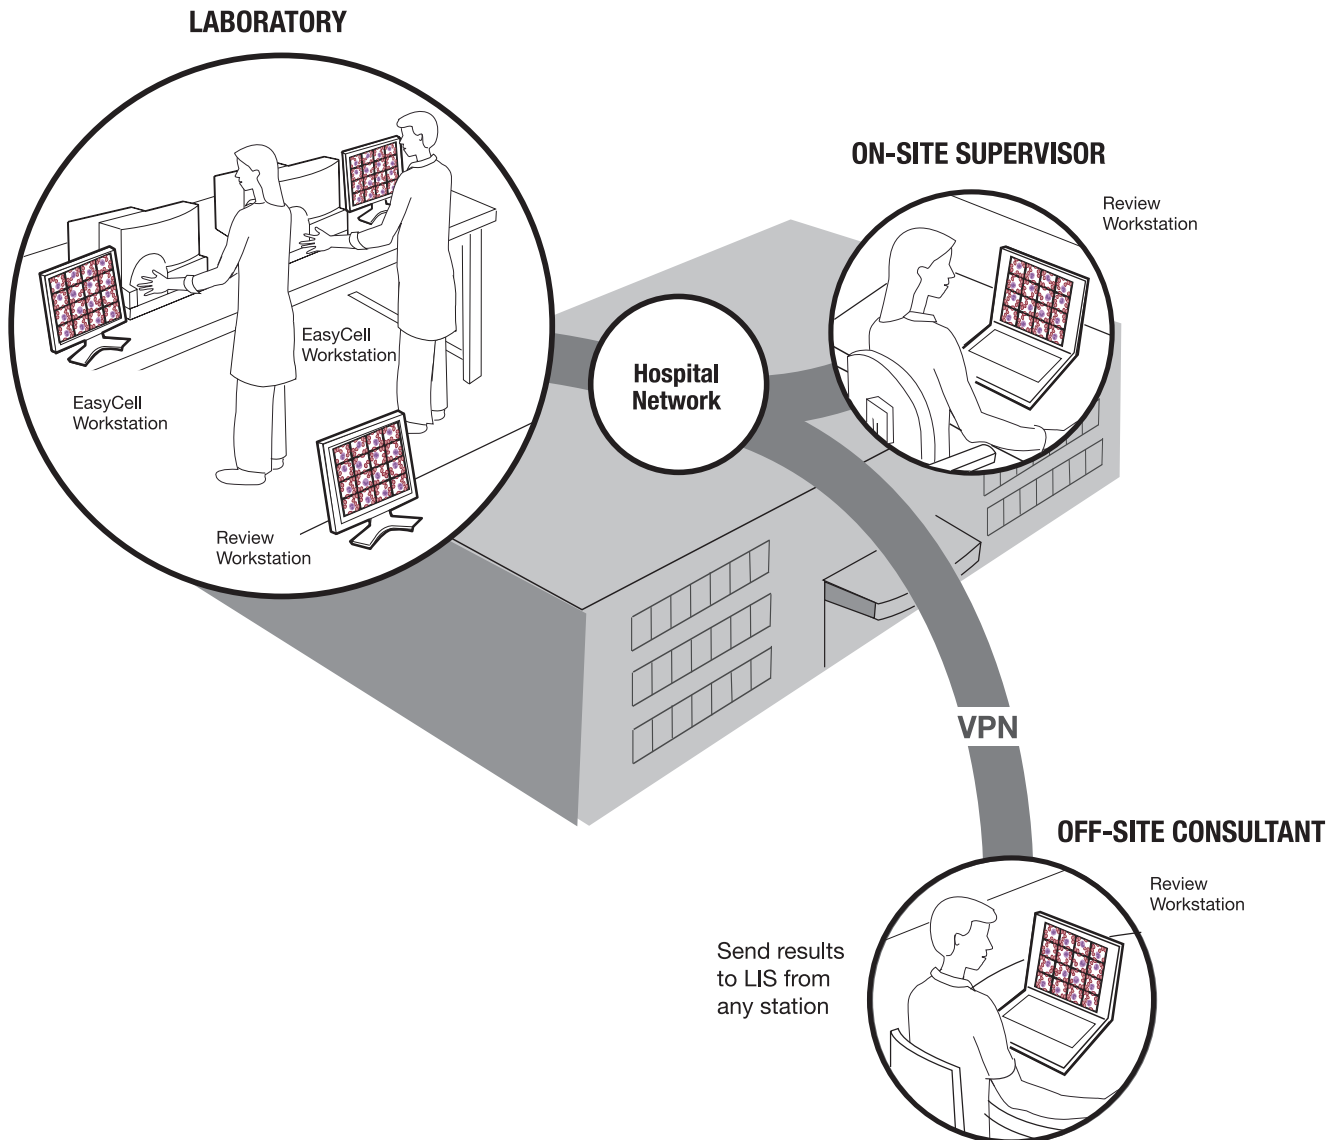

Monitor quality in the lab
View patient results from all areas of the lab. Supervisors and administrators can review sample results and assure consistency in reporting.

Instant clinician access to image results
Decisions regarding patient treatment may be accelerated with rapid viewing of images from any pathologist's office. Access to EasyCell image files permits comparison of results over the history of the case.
